- for display, notice and announcement boards

Great for POP Advertising!

Do you need a lot of inexpensive non-lit signs? Do you need a sign that has ease of use and serves many purposes? The TechniFlat is the sign you've been looking for.

At only 1/4" deep, this ultra thin flat sign offers a streamlined look with quick graphic change outs. A simple suction cup is all that is needed to pull the acrylic protective face material from it's magnetic holder.

The perfect solution for theatres, cinemas, libraries, schools, public spaces, transit stations, directories, video stores, museums and hospitals as well as anywhere that you need POP advertising! Smart...easy...fast...TechniFlat.

PARTS AND SERVICE

We pride ourselves in our commitment to quality and reliability in all of our products. Our TechniFlat signs are warranted to be free of defect in workmanship. If you require any help with your sign please call us at 1.800.730.5853.

INSTALLATION

Tools required: screwdriver, drill and bit, flat head screws and wall anchors for mounting (not supplied)

Instructions:

1. Remove face material using the suction cup provided.
2. Drill holes through the sign back pan in desired locations avoid drilling through frame back.
3. Mark holes on wall and drill holes.
4. Insert matching wall anchors into holes.
5. Place sign over holes and secure with screws.
6. Insert graphic.
7. Replace face material.

Alternate mounting method: (for signs less than 2 feet in area)

1. Place double sided tape on back of sign in each corner.
2. Remove protective coating from tape and press sign firmly into place on wall.

Graphic Installation:

1. Use the provided suction cup to remove the acrylic face material.
2. Insert graphic.
3. Replace the acrylic face material.
4. Remove suction cup from face material and store.

Cleaning Instructions:

Use a non-abrasive glass cleaner and a soft cloth to clean the acrylic face material.
