EXTRUSION KITS

At TechniLite Systems we've made building your own sign an easy thing! Most of our extrusions use a simple corner key that will give you a perfect corner every time. Our stock 10' long extrusions are available in powder coated black or clear anodized aluminum. You can order from our stock and be building your project in as little time as it takes to ship it to you. Our Technical Sales team can help you determine the right sign system to suit your needs. You may also want to view our TechniLite and TechniTwin lighting systems to complete your project.
